

FEATURES

Stable Cooling, Outstanding Performance

A large capacity ice bank maintains a stable cooling temperature and keeps beverages below 5°C. The equipment can continuously dispense up to 77L, ensuring excellent performance during peak periods.

Excellent Quality Control & Dispensing Capacity

Quickly pre-cools beer or as a pre-chiller, enhancing the quality of the drinks served. It can be used to dispense multiple types of beer or paired with a soda fountain machine to improve its dispensing capacity.

Certified Materials, Easy Maintenance

Made with a 430 stainless-steel cladding and 304 stainless steel beer pipes, both certified as food-grade materials. Components are easy to disassemble, allowing for quick replacement of pumps and stainless-steel pipes, making maintenance more convenient.

Compact Size, Space-Saving

With a compact design of only 430mm in width, it saves under-table space.

Technical Specifications

Product Category	Precooler
Model Number	PC-SV1
Electrical Rating	230V 50Hz
Blending Capacity	77L(For beverages below 5°C) Note: Under conditions of water intake temperature and ambient temperature both at 25°C
Dimensions	W430mm xD430mm xH720mm
Rated Power	560W
Refrigerant	R134a
Exterior Structure	430Stainless Steel
Beer pipe material	304Stainless Steel
Weight	41kg
Ice Bank Size	18kg
Warranty	One year

For details about the materials required for installation, please refer to the Installation Manual.
